Fariz Alamsyah

Full-Stack Developer

farizalmsyh.dev@gmail.com | github.com/farizalmsyh

PROFESSIONAL SUMMARY

Full-Stack Developer with 5+ years of experience building and maintaining web and mobile products across talent platforms, SaaS, IoT, education, and commerce. Experienced in frontend and backend development, API integrations, relational databases, real-time systems, cloud deployment, and payment integrations. Comfortable delivering independently and collaborating across product and engineering teams.

TECHNICAL SKILLS

Frontend: Next.js, Nuxt.js, Angular, Vue.js, jQuery, Tailwind CSS

Backend: Go, Node.js, NestJS, Laravel, CodeIgniter, REST APIs

Mobile & realtime: React Native (Expo), WebSocket, MQTT, Pusher

Data & cloud: PostgreSQL, MySQL, BigQuery, Google Cloud Platform

Payments: Midtrans, BNI SNAP QRIS MPM

Delivery: CI/CD, Docker, Linux, Nginx

EXPERIENCE

Full-Stack Developer — MyOrbit

Apr 2026 – Present

TechConnect · MyCareer staging platform

- Develop and maintain frontend and backend features for a full-stack talent platform.
- Build user-facing workflows and backend APIs, integrate application data services, and contribute to implementation, testing, and deployment.

Frontend Angular Developer

May 2022 – Sep 2022

PT Ako Media Asia (Salt Indonesia) · West Jakarta, Indonesia

- Developed and maintained Angular web applications, building responsive interfaces from design specifications and integrating backend APIs.
- Optimized application performance and wrote unit and end-to-end tests with Jasmine.

Web Developer

Jan 2021 – Mar 2022

CV Inti Multi Solusi · East Jakarta, Indonesia

- Planned, developed, deployed, and maintained client web applications using Angular, Vue.js, Laravel, CodeIgniter, MySQL, and PostgreSQL.
- Translated client requirements into functional designs, resolved application issues, and designed APIs for external integrations.

SELECTED PROJECTS

Frapomate POS Subscription System Feb 2024 – Sep 2024

Frapomate · frapomate.com · Next.js

- Built frontend workflows for POS subscriptions and transactions; led deployment and contributed to a reported 40% increase in user engagement.

Plantera — IoT Smart Farming App May 2024 – Aug 2024

Pusat Laboratorium Terpadu, UIN Jakarta · NestJS, Expo React Native, PostgreSQL, WebSocket, MQTT

- Built mobile app and backend for monitoring and controlling IoT devices; improved data-processing speed by 25%.

Rekajasa Company Profile Jan 2024 – Jul 2024

PT Rekajasa Asyatama · rekajasa.co.id · Laravel, jQuery, MySQL

- Developed the company website and optimized code and database queries, reducing load time by 40%.

Toekangku — Job Seeker App Nov 2023 – Jan 2024

Bangkit Academy · Laravel, PostgreSQL, Pusher, Google Cloud Platform

- Built backend services and managed deployment, monitoring, and CI/CD; reduced response time by 30% and server downtime by 25%.

Pegadaian Employee Training Dashboard Jun 2023 – Nov 2023

Pegadaian · Node.js, Nuxt, PostgreSQL, Cloud Run, BigQuery

- Developed dashboard and reporting services for employee training monitoring; deployed scalable analytics infrastructure on Google Cloud.

Elingway Learning Management System Feb 2021 – Oct 2023

Elingway · elingway.id · Laravel, Angular, Vue.js, PostgreSQL, Midtrans, Pusher

- Built LMS APIs and interfaces, integrated Midtrans payments and real-time notifications, and managed PostgreSQL data.

Ministry of Religious Affairs Cooperative POS Aug 2021 – Mar 2022

Koperasi Warga Kantor Kementerian Agama · Laravel, jQuery, MySQL

- Developed sales and inventory workflows, backend APIs, and database features for the cooperative POS platform.

EDUCATION

S1 Informatics Engineering (in progress) 2021 – Present

Syarif Hidayatullah State Islamic University Jakarta

Software Engineering 2019

SMK Negeri 10 Jakarta
